## FOOTLOOSE MINNESOTANS: 44 PERCENT MOVED BETWEEN 1985 AND 1990

Fifty percent of residents of the seven-county Twin Cities area moved at least once between 1985 and 1990, recently released 1990 Census information shows.

Statewide, 44 percent of Minnesotans aged 5 or older lived in a different house in 1990 than five years earlier. Mobility was even greater in Minneapolis, where 56 percent of the 1990 population lived in another house in 1985.

"Fast-growing communities have a lot of newcomers without deep roots," said Linda Kohl, Minnesota Planning Director. "In some counties, more than 30 percent of the population lived in another county or state only five years earlier."

The least mobile Minnesotans lived in rural areas of southwestern and northwestern Minnesota. Fewer than 25 percent of the 1990 residents of Marshall and Traverse counties moved between 1985 and  $199\bar{0}$ . In 15 other counties, fewer than 30 percent moved.

Apart from the Twin Cities area, the greatest residential mobility was in growing areas like Rochester and St. Cloud, and in counties with colleges and universities.

Many Minnesotans who moved in the last half of the 1980s moved into new houses or apartments. Statewide, one in 10 occupied houses was built between 1985 and 1990. The Twin Cities suburban area (excluding Minneapolis and St. Paul) accounted for 59 percent of housing units built between 1985 and 1990. One-fourth of housing units occupied in 1990 in Dakota County were built in the previous five years. By contrast, only 3 percent of occupied housing units in Minneapolis and St. Paul were less than five years old in 1990.

In all, 1.8 million Minnesotans over age 5 moved between 1985 and 1990. Seventy-eight percent of Minnesotans lived in the same county in 1990 as they did in 1985. Thirteen percent lived somewhere else in Minnesota in 1985. New residents from outside the state accounted for 8 percent of the state's total 1990 population.

The heaviest concentrations of in-migration from other counties or states were in counties on the Twin Cities fringe and counties with colleges or universities. More than 30 percent of the 1990 population in Benton, Blue Earth, Dakota, Nicollet, Sherburne and Washington counties moved from another county or state between 1985 and 1990.

Newcomers from other states accounted for more than 10 percent of the population in the growth counties of Dakota, Hennepin, and Olmsted and in the border counties of Clay, Wilkin and Winona.

-end-
